## HARDY LILIES

## DELIVERIES FROM LATE FALL ON

Plant bulbs immediately on arrival in a well drained soil, giving them plenty of opportunity for root action. The containers should then be set on a raised platform in a cool, semi-dark place, affording perfect drainage. When flower buds appear, the plants will then readily submit to forcing. They may also be planted out of doors for flowering in June and early July and later.

Vigorous grower, attaining sometimes as high as twenty flowers or even more on a single stem. Stem rooting. Plant the bulb 8" deep in any good well drained loam, with or without lime, preferably in a sunny position. Height 4-6 ft. July flowering.
